SUMMARY

Data Engineer with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech – Computer Science and Engineering – CGPA: 8.1 / 10

2024 – 2028

Bhopal, Madhya Pradesh

EXPERIENCE

Data Analyst Intern

Dataview Analytics (Remote)

April 2025 – June 2025

Tools: Excel, SQL, Power BI

- Processed and standardized **1,00,000+** rows of multi-region data to support weekly KPI tracking across business units.
- Built Excel templates with lookup functions and pivot logic, **cutting reporting time by 40%** across 4 departments.
- Developed Power BI dashboards for revenue trends and customer mix; collaborated with 6 stakeholders to define and validate KPIs.

PROJECTS

ByteScan – Universal Data Analyzer | *React, TypeScript, Gemini API, Tailwind CSS*

Mar 2026 – Present

- Built a multi-agent AI tool using Gemini Flash Lite to transform documents, logs, and raw data into executive summaries via a **4-stage agentic pipeline**.
- Engineered multi-modal ingestion (text, PDF, camera), automated entity parsing, and Google Search Grounding for real-time metric enrichment.
- Embedded an interactive **RAG chat assistant** for file-specific queries; designed a responsive Tailwind dashboard surfacing priority insights instantly.

SEND – Financial Strategy Platform | *React, Java Spring Boot, OCaml, Supabase, Docker* | [sendsys.io](#)

2025

- Co-built a full-stack financial education platform with a **node-based visual strategy editor** for building trading algorithms – deployed live at sendsys.io.
- Architected a **high-performance OCaml execution engine** for backtesting strategies against real US market data (OHLCV, income, balance sheet, cash flow CSVs).
- Implemented secure auth and replay tooling via **Java 21 / Spring Boot + Supabase**; containerized full stack with Docker Compose.

Customer Churn Analysis | *Python, Pandas, Matplotlib, Seaborn*

January 2026

- Analyzed **7,043 telecom customers** to surface churn drivers across tenure, contract type, and monthly charges via feature engineering and EDA.
- Produced **11 visualizations** (heatmaps, box plots, histograms) revealing 38% of churned users held short-tenure monthly contracts – informing retention strategies.

TECHNICAL SKILLS

Languages & Querying: Python, R, SQL, TypeScript, JavaScript

Data & Visualization: MS Excel, Power BI, Tableau, Pandas, Seaborn, Matplotlib

Analytical Skills: Data Cleaning, EDA, Feature Engineering, Descriptive Statistics

Frameworks & Tools: React, Tailwind CSS, REST APIs, Gemini API, Git, GitHub, Vercel, Docker

CERTIFICATIONS

- Certificate Course in AI** – National Institute of Electronics & Information Technology (NIELIT)
- Google Advanced Data Analytics Certificate** (2026) – SQL, data cleaning, dashboards, presentations. *Credly Badge*
- NPTEL Cloud Computing** (NPTEL25CS11S1045700639) – 8 case studies in practical cloud deployment.

EXTRACURRICULAR

- Built **Sasyam** – an AI-powered agricultural intelligence web app (RAG assistant, crop classification ML model, smart crop suggestor) under a 24-hour hackathon deadline.
- Active interest in generative AI, creative applications, and data storytelling.
